

Mapping the Belgian Organisations in the Water Sector with International Development Cooperation Activities

Alice Alonso

April 2020

Report as part of the Water Nexus Policy Support Project

Water Nexus is a policy support research project financed by the Belgian Directorate General for Development Cooperation and Humanitarian Aid (DGD) and conducted by a consortium of Belgian universities.

Alice Alonso is researcher at the Earth and Life Institute, Environmental Sciences. Université catholique de Louvain, Louvain-la-Neuve, Belgium

Overview

Given the complexity of the water-related challenges globally, ensuring efficiency and enhanced, sustainable impacts of efforts requires a coherent and coordinated actions between the actors and programs. Knowing the Belgian actors and their expertise is a necessary step for Belgium to define and implement a water coherent strategy and programs that align with the Belgian expertise. We conducted a survey in June 2019 to inventory the Belgian actors, the outputs of which are presented in this document in form of graphs and tables. The survey revealed a wealth of organisations and expertise, with 45 entries from private sector companies, 31 from research groups or institutions, 22 from government-recognized NGOs, 15 from public agencies or utilities, 10 from platforms or clusters, and 3 from NPO or 4th pillar organisations (Figure 1 and Tables 1 to 6). Amongst these organisations, the ones who were allocated ODA funding as *Project-type interventions* or *Core support to NGOs, other private bodies, PPPs and research institutions*¹ are Enabel, Join For Water-Protos, and to a lesser extent² the APEFE, Solidagro, ARES, Rode Kruis Vlaanderen, VLIR-UOS, UNICEF Belgium, Iles de Paix, WWF, and NGO Congo-Village. We refer to these organisations as “DGD implementation partners”.

The surveyed organisations cover a wide range of expertise, as depicted in Figure 2. That figure reveals that the top five fields of expertise are on the water supply, waste water treatment, water and sustainable cities, Water, Sanitation and Hygiene (WASH), and water and agriculture, although all the other fields of expertise are defining at least 20 organisations. This field classification changes to Water supply, disaster risk management, water and sustainable cities, equipment supplies, and hydropower when only looking at the DGD partners (Figure 3). Sectoral specificities emerge when looking at the keywords reported by the organisations (Figure 4). The most prevalent keywords per sectors are the following:

- Research: Integrated water management, ecology and biodiversity, groundwater, modelling, climate change, water treatment, modelling, monitoring, technology.
- Private sector: wastewater treatment, hydroelectricity, integrated water management, modelling, chemicals
- NGOs/ NPOs/4th pillar: health, agriculture and irrigation, sustainable development, empowerment, children, water security
- Public: drinking water, management, education, forecasting, and several keywords related to collaboration and networking
- Platforms and cluster: advice, networking, capacity building, policy, lobbying and other related keywords.

The surveyed actors have had activities all over the world (Figure 5), with the countries partner of Belgium development cooperation (DGD) among those having the highest number of active

¹ Project-type interventions: Projects done "on assignment" through earmarked funding . Core support: 5-y programs of NGOs for which they have the right of initiative.

² Based on the Belgian PRISMA database for ODA reporting between 2008 and 2019. The organisations who received less than 1millions EUR were not listed not further considered as “DGD partners”. The APEFE, ARES, UNICEF and NGO Congo-village have not responded to the survey yet, and their data are therefore not included in the inventory and analysis.

Belgian organisations (see also Table 7). The global presence of DGD's implementation partner mirrors the one from all the organisations (not shown here).

The inventory is hosted in a searchable online dashboard in the Water Nexus website. We also recommend to consult a second dashboard compiling the references to scientific peer-reviewed work conducted by Belgian academics in topics related to the sustainable development goal 6 on water, as well as the related bibliometric analysis paper.

In spite of our effort to reach as many organisation as possible, the actor inventory is certainly not exhaustive. The analyses, tables and figures must therefore be looked at in light of this limitation.

Figures and Tables

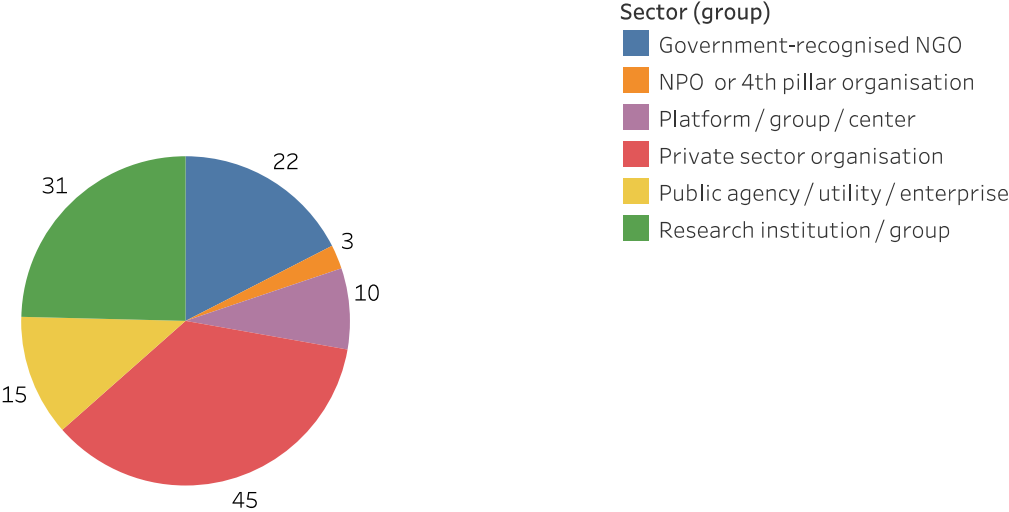

Figure 1. Number of organisations by sector.

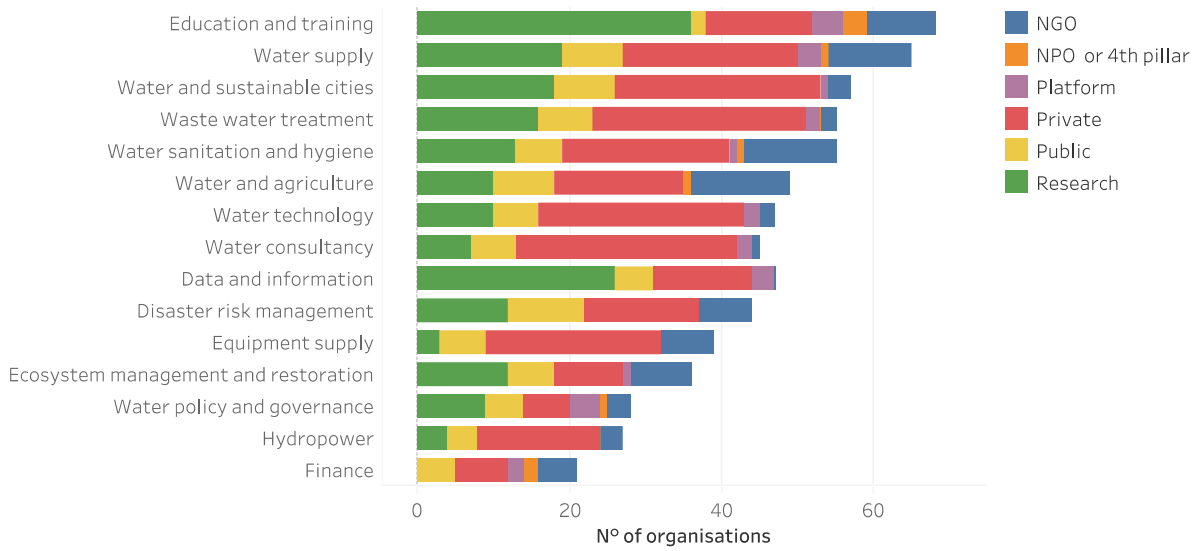

Figure 2. Number of organisation by field of expertise and by sector.

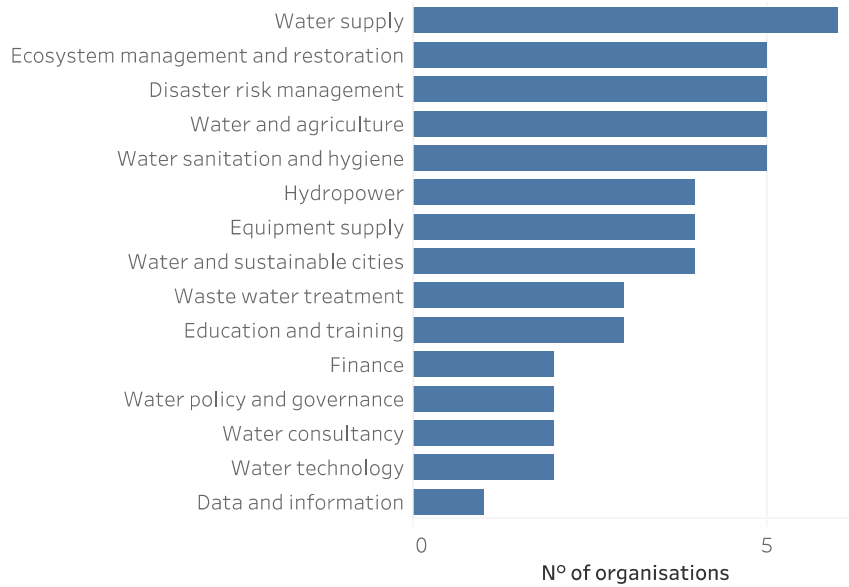

Figure 3. Number of organisation by field of expertise for the DGD implementation partners who responded to the survey.

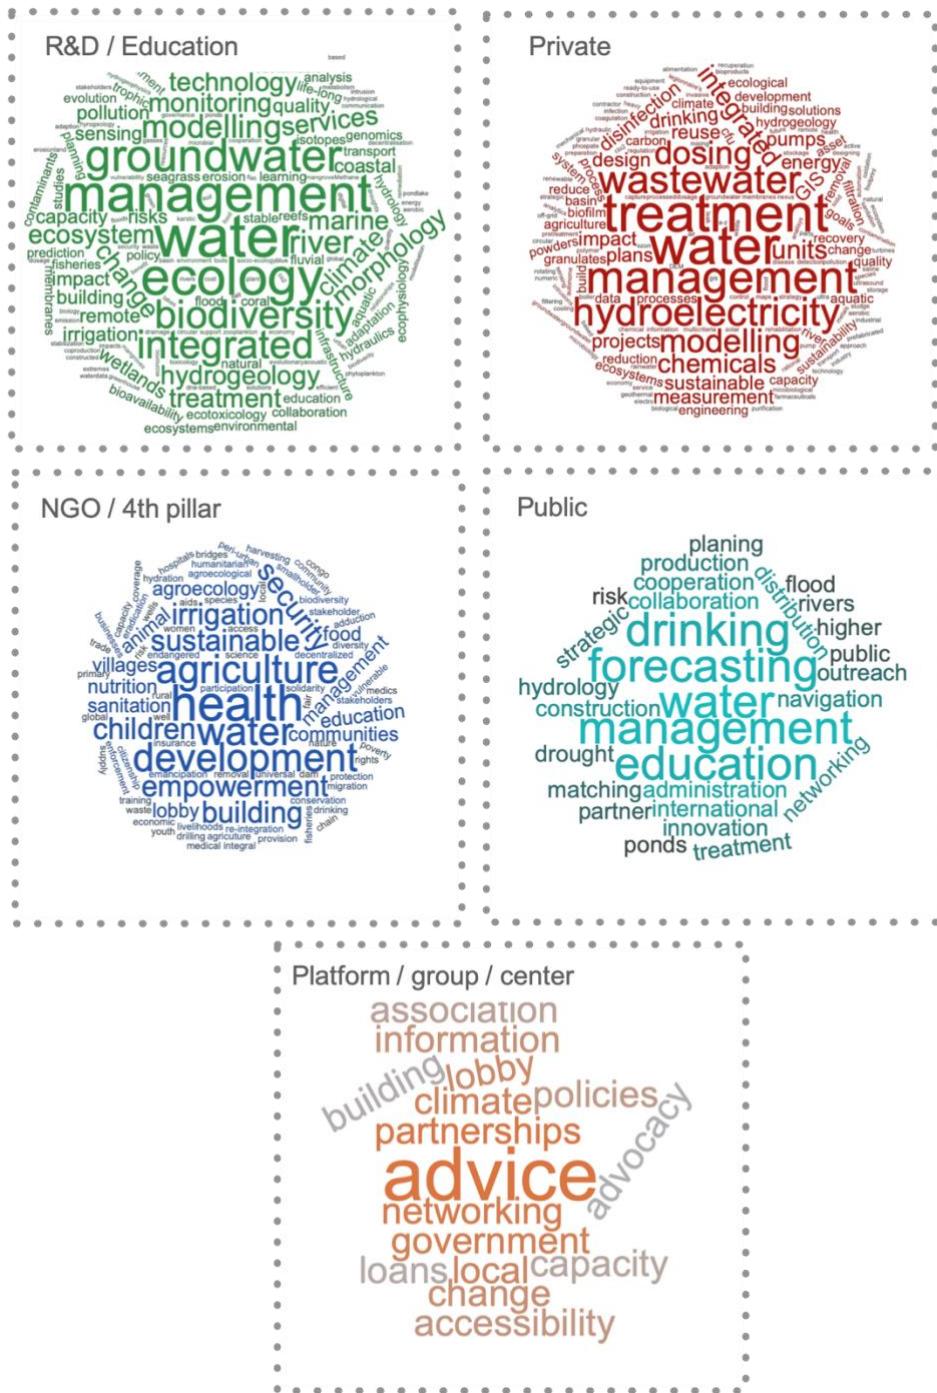

Figure 4. Word cloud from keywords provided by the organisations separated by sector. The font size is proportional to the recurrence of the respective word in each sector. Font size should not be compared across sectors..

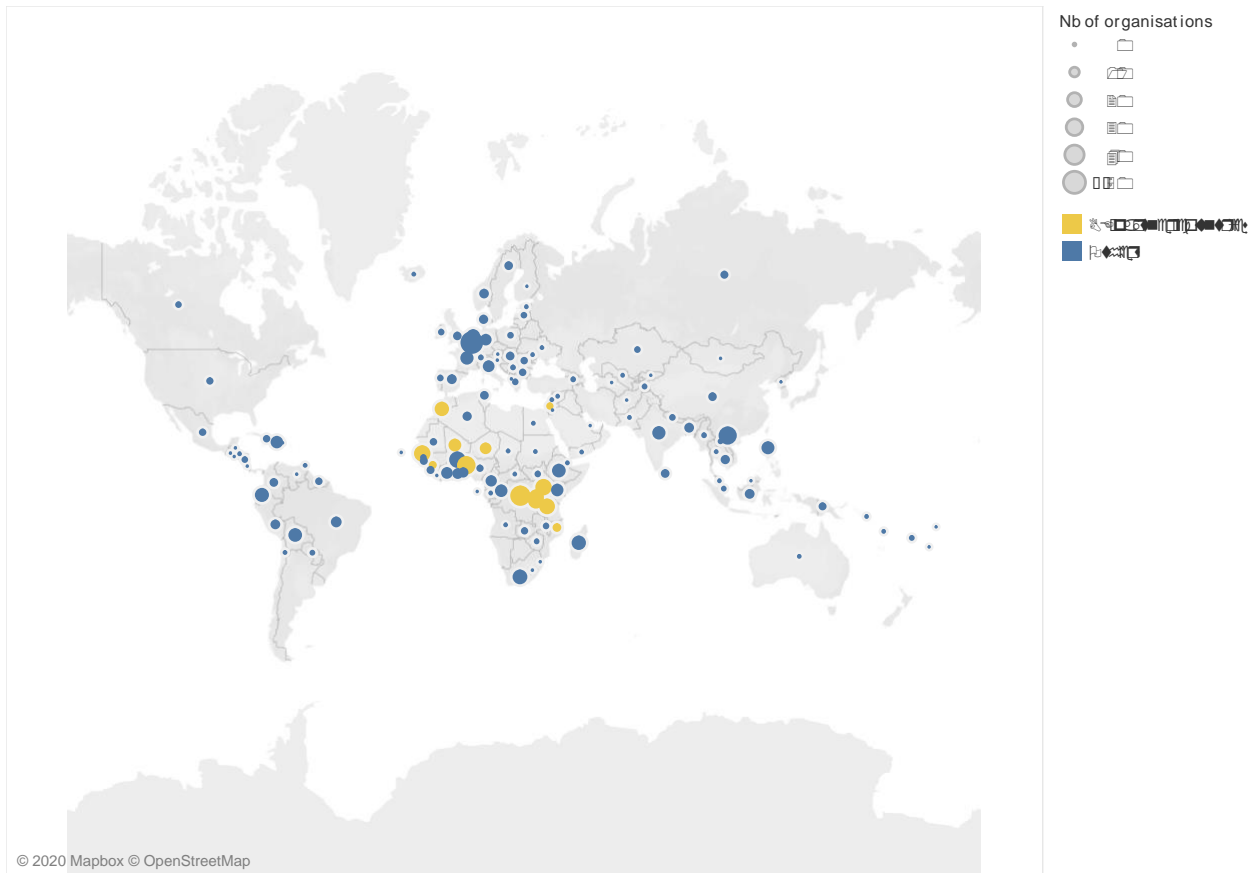

Figure 5. Number of organisations having had activities in world countries over the course of the past 10 years.

Listing of organisations classified by sectors

The color code is indicative of the answer provided by the organisation regarding the role taken by water in their activities:

- Water projects are the main focus of my organisation
- Water projects are important for my organisation, though my organisation also runs non-water related projects
- Water is included as an aspect into most of our projects, but is mostly not the main objective of our projects
- Water is rarely included in projects of my organisation

Table 1. List of public sector organisations (public agency, utility, enterprise, or utility foundation, (inter)government, institutional actor).

Name	Acronym	Description
Agence wallonne à l'Exportation et aux Investissements étranger	AWEX	AWEX aide les entreprises wallonnes à investir à l'étranger à travers, notamment, des entreprises dans le secteur de l'eau
Belgian Development Agency	Enabel	/
Bruxelles Environnement - Leefmilieu Brussel	BE - LB	Bruxelles Environnement participe au Fonds de solidarité internationale de la Région de Bruxelles-Capitale dans le domaine de l'eau. Le Fonds est donc spécifique à des projets d'accès à l'eau potable et à un assainissement adéquat dans certains des pays repris ci-dessous
De Watergroep		Production and distribution of drinking water
Engie Fabricom	ENGIE FABRICOM	/
Intercommunale Namuroise de Services Publics	INASEP	INASEP assure la production et la distribution de l'eau et la gestion des équipements techniques des communes et d'autres partenaires publics. INASEP est considérée comme un pôle de compétences dans le domaine de l'eau et dispose de bureau d'études spéciaux.
Service public de Wallonie Mobilité et Infrastructures - Direction de la Gestion hydrologique	SPW-MI DGH	/
Service Public de Wallonie, Département Environnement et Eau	SPW - DEE	/
Société wallonne des eaux	SWDE	/

Name	Acronym	Description
UNESCO - International Hydrological Programme ; Belgian National Committee	UNESCO - IHP - Belgium	<p>The International Hydrological Programme (IHP) is the only intergovernmental programme of the UN system devoted to water research, water resources management, and education and capacity building. Since its inception in 1975, IHP has evolved from an internationally coordinated hydrological research programme into an encompassing, holistic programme to facilitate education and capacity building, and enhance water resources management and governance.</p> <p>IHP facilitates an interdisciplinary and integrated approach to watershed and aquifer management, which incorporates the social dimension of water resources, and promotes and develops international research in hydrological and freshwater sciences. UNESCO's International Hydrological Programme, founded in 1975 and implemented in six-year programmatic time intervals or phases, is entering its eighth phase to be implemented during the period 2014-2021.</p>
Vlaams Kenniscentrum Water	VlaKWa	Independent department of VITO. Integral waterworks for companies.
Vlaamse Interuniversitaire Raad - Universitaire Ontwikkelingssamenwerking	VLIR-UOS	/
Vlaamse Milieumaatschappij	VMM	Flanders Environment Agency (abbreviated VMM) is an agency of the Flemish government working towards a better environment in Flanders. Water, air and the environment. These are the three domains in which VMM is active. Within these three domains we have a wide range of responsibilities.
Vlaamse overheid Departement Economie, Wetenschap en Innovatie (EWI)	EWI	Facilitating international science-based collaboration
VVOB		Strengthening education systems worldwide. Possibility to provide education and training for water technicians through programmes in technical and vocational education.

Table 5. Lists of research and development institutes or groups.

Name	Acronym	Description
Hogeschool Gent	HOGENT	Optimalisation of waste water treatments and DNA-based monitoring of aquatic biodiversity
KU Leuven - Dept. Civil Engineering - Hydraulics Section	KU Leuven - Hydraulics	Keywords: Hydrological Extremes, Climate Change Impacts, Climate Adaption
KU Leuven Process Engineering for Sustainable Systems	KU Leuven ProcESS	Keywords: Water Technology, Membranes
KU Leuven, Department of Biology, Laboratory of Biodiversity and Evolutionary Genomics	KU Leuven-LBEG	Keywords: Fish, Ecology, Evolution, Biodiversity, Genomics, Fisheries
University of Leuven, Department of Biology, Laboratory of Aquatic Ecology, Evolution and Nature Conservation	KU Leuven	Keywords: Global Change Biology, Pond And Lake Ecology Biodiversity, Evolutionary Ecology, Zooplankton , Microbial Ecology
Royal Belgian Institute of Natural Sciences, CEBioS programme	RBINS-CEBioS	Museum and research institute with a policy mandate. Keywords: Policy , Research, Capacity Building
Thomas More University of Applied Sciences	TMK	Water sanitation using natural systems (treatment wetlands). Capacity building, design and construction of treatment systems.
Universiteit Antwerpen, Faculty of Science, Department of Biology, Systemic Physiological and Ecotoxicological Research	Uantwerp - SPHERE	SPHERE conducts fundamental and applied research concerning the adaptation of aquatic and terrestrial organisms to their environment and the effects of environmental contamination on the health status of organisms, populations and communities. Within this framework three lines of research can be distinguished. The first line is work concerning the bioavailability and accumulation of environmental contaminants, the second line concerns the mode of action and mechanisms of toxicity and the third line aims to relate effects at different levels of functional organisation. The research uses in vitro as well as in vivo models and focuses on molecular and cellular aspects (gene expression, protein synthesis, cellular functions) as well as organismal aspects (bioavailability, homeostasis and adaptation). The studies have different applications in environmental toxicology with special emphasis on environmental diagnostics and the development and evaluation of environmental quality criteria (molecular and

		cellular markers, exposure and effects models, toxicity evaluation and risk assessment).
University of Antwerp - Institute of Environment and Sustainable Development	Uantwerp, IMDO	The Institute of Environment and Sustainable Development, brings together the expertise on environment and sustainable development within the University of Antwerp, Belgium. IMDO offers multidisciplinary research and education programs that aim to support the complex challenges of society, industry and authorities on sustainability questions. Keywords: River Basin Management Ecosystem Services Water Technology Water Governance Toxicology
Université catholique de Louvain, Institute of Mechanics, Materials and Civil Engineering, Civil and Environmental Engineering	UCLouvain - IMMC	Keywords: Fluvial Hydraulics, River Morphology, Sediment Transport, Flood Prediction and Modelling
Université catholique de Louvain, Materials and Process Engineering, Development of eco-efficient processes for sustainable industrial chemical and biochemical engineering	UCLouvain -	Keywords: Membrane Technology, (Waste)Water Treatment, Education
Université catholique de Louvain	UCLouvain - ECRU	Economic analysis of demand, Contestabilité, Économique Et Sociale, Rôle Des Coopératives , Etude Intégrée Des Impacts
University of Louvain (UCLouvain) Faculty of Architecture, Architectural Engineering and Urban Planning	UCLouvain - LOCI	Studying water inflows and outflows as key flows in the urban metabolism approach, alongside other key resource flows
UCLouvain, Earth and Life Institute, Environmental Sciences, Soil and water engineering and management group	UCLouvain-ELI-GERU	Keywords: Agro-Hydrology, Erosion And Land Conservation, Remote Sensing And Hydrogeophysics, Irrigation / Drainage, Soil Water Plant Relationships, Integrated Water Resources Management
Ghent University, Faculty of Engineering, Department of Civil Engineering IR15	Ugent -	Keywords: Integrated Water Management, Natural Risks, Climate Change Adaptation, River Morphology, Coastal Erosion

Ghent University CAPTURE	Ugent - CAPTURE	CAPTURE (www.capture-resources.be) is a multidisciplinary research platform that focuses on resource recovery from water, CO2 and plastic. An important objective of the CAPTURE initiative is to translate research into societal stakeholders such as businesses, governments and citizens. Currently 20 professors are involved. A dedicated building, located on the easily accessible new technology park Eiland Zwijnaarde, south of Ghent is the focal point of the platform. This building contains a large technology hall (800 m ² ; 2 floors) for larger experimental setups as well as 2 floors of incubator space for start-ups. CAPTURE is a collaborative initiative between UGent, UAntwerp and VITO.
Ghent University - Protistology & Aquatic Ecology	Ugent - PAE	Keywords: Biodiversity, Phytoplankton, Ecology, Monitoring, Wetlands
ULB - Systems Ecology & Resource Management Unit	ULB - SERM	Keywords: Ecosystems, Remote Sensing, Socio-Ecology, Ecology, Mangrove, Aquatic Biodiversity
Uliege - Aquapole	Uliege - Aquapole	Keywords: Hydrology, Hydrogeology, Modelling, Quality, Integrated Management
University of Liège, Water, Environment & Development lab - Department of environmental sciences and management	Uliège - EED	Keywords: Integrated Water Resources Management, Irrigation, Decision Support Tool, Remote Sensing, Food Security
ULiège-Gembloux Agro-Bio Tech	Uliège - GxABT	Keywords: Hydrology, Conservation, Irrigation
Laboratoire d'Ecologie Animale et Ecotoxicologie, ULiège	ULiège - LEAE	Impact des polluants sur les écosystèmes aquatiques, dosage des polluants dans les écosystèmes/effluents
Uliège - Laboratoire de Morphologie Fonctionnelle et Evolutive	ULiège - LMFE	Nous travaillons principalement sur la biodiversité piscicole
University of Liège, Focus Research Unit, Laboratory of Oceanology, Stable Isotopes in Environmental Sciences and Trophic Ecology	Uliège - SIESTE	Keywords: Marine Ecology, Marine Biodiversity, Seagrass, Coral Reefs, Stable Isotopes, Trophic Ecology
ULiege, Urban and Environmental Engineering Research Unit, Hydrogeology and Environmental Geology	Uliege - UEE - HGE	Keywords: Groundwater, Groundwater Quantity, Groundwater Quality, Hydrogeology, Groundwater Vulnerability

Université de Liège - Unité Océanographie Chimique	Uliège - UOC	Nos recherches portent sur les émissions de gaz à effet de serre par les rivières et les lacs
University of Namur - Department of geology	UNamur	Keywords: Hydrogeology, Salt Water Intrusion, Karstic Environment
VITO, Water Management and Technology	VITO	VITO has a clear view on soil, sediments and water and provides 360° solutions by combining expert advice and technology with data-to-information tools. Keywords: Integrated Water Management, Digital Water And Data Solutions, Water Quality Monitoring & Remediation, Water Risks (Floods & Droughts), Cost Benefit Analysis, Ecosystem Services, Water means life, we create innovation pathways that strengthen our natural resources to better cope with climate change, urbanization and economical growth.
Vrije Universiteit Brussel, Department of Hydrology and Hydraulic Engineering (HYDR)	VUB- HYDR	Modeling
Vrije Universiteit Brussel, Department of Hydrology and Hydraulic Engineering (HYDR), Groundwater research group	VUB - HYDR - GW	Groundwater, Hydrogeology, Sustainable, Water Management, Groundwater Modelling
CEBEDEAU asbl	CEBEDAU	Hosted in ULG Aquapole. Keywords: Technical Assistance Laboratory, Drinking water, Municipal and industrial waste water, Research and Development, Hosted in ULG Aquapole
